WQAW Award of Merit

By Cheryl Lytle, WQAW Administrative Assistant

In January 2009, the Wisconsin Department of Commerce, Safety & Buildings Division sent a notice to the WQAW and manufacturers of water treatment devices to inform them of the expanded scope of water treatment device approval to be put into place on July 2009. The WQAW organized the industry's players to create a plan to fight the expansion approval program.

Loretta Trapp, Clack Corporation and Jeff Hellenbrand, Hellenbrand Inc., took time to make phone calls and appointments with industry and state officials to represent the water treatment industry position.

In June 2009, the Dept. of Commerce notified the industry that the product review expansion would be rescinded and commercial devices would not need to be submitted for product approval.

“Loretta is well-respected for her intellect and understanding of many water-related matters and state protocol. We were well represented by her on this issue”, stated President Don Meredith.

“Jeff Hellenbrand has been active at many junctures on our industry issues”, said Meredith “He has contributed many hours with much effort in a common-sense and practical way.”

Hellenbrand & Trapp honored with WQA Award of Merit

Jeff Hellenbrand, WQAW President Don Meredith, and Loretta Trapp.

The WQAW Board of Directors presented both Loretta Trapp and Jeff Hellenbrand with the WQAW Award of Merit in recognition of extraordinary action on regulatory issues in the support of the industry of Wisconsin.

“Our association is fortunate to have members that are capable and willing to work on our behalf”, stated Don Meredith, WQAW President, “it was an honor to present both Loretta and Jeff with the WQAW Award of Merit”.
